Precision Skin Marking Systems

Transforming care with Suremark®.

We at **Suremark®** are grateful for your service to those in need of healing and positive energy. With this in mind, we've dedicated ourselves to developing innovative **PRECISION SKIN MARKING PRODUCTS** that not only address the needs of technologists and doctors, but also offer moments of relief from the stress of medical procedures.

With the overwhelming success of our **ComfortMark™** and **BeautyLine™** products, we've witnessed what healthcare professionals coin the **“Suremark® Butterfly Effect.”** We've infused this positive vibe into our latest offerings for MRI, and radiation therapy procedures. The butterfly symbolizes renewal and healing – a beacon of lightness, playfulness, and joy. At Suremark®, it embodies care and understanding, recognizing that patients and caregivers are navigating challenging situations, where a kind word accompanied by a beautiful butterfly can make a meaningful impact.

Suremark® pioneered the creation of a complete line of environmentally-safe, NON-METALLIC precision skin markers for the medical industry, and our LATEX-FREE labels are meticulously designed and manufactured to surpass the highest quality standards. With advanced label adhesive and precise marker placement, **Suremark®** labels are guaranteed to be the best performing markers you've ever used. Trust that every **Suremark®** marking system will stay securely in place, delivering clear and consistent results across all your medical imaging applications from the very first use.

Drawing from our experience, **Suremark®** has applied numerous manufacturing techniques that greatly improve efficiency, leading to substantial savings compared to competing brands, and all **Suremark®** labels are backed by an unconditional one-year money-back guarantee.

RadTat Impermanent Ink Skin Marking

RadTats were designed with both patients and providers in mind. A simple and painless application process with no maintenance. Providers no longer worry about loss of marks from lack of care, accidental needle-sticks, or cross-contamination from conventional markers. Patients no longer worry about losing marks while bathing or exercising, unwanted tattoos that create emotional reminders or allergic skin reactions from adhesive coverings.

RadTat is the first non-invasive, semi-permanent skin marking for radiation oncology.

This product will last up to two weeks with little to no maintenance by patient or care provider. **This is not a sticker!**

In lieu of permanent or temporary tattoos, apply **PortalMark™** labels to delineate radiation treatment areas. Their premium medical grade adhesive is hypo-allergenic and latex-free, resulting in less irritation for the patient. **PortalMark™** labels are constructed of waterproof, yet breathable material for maximum performance and comfort for up to two weeks. Our unique Suregrip™ applicator discs ensure easy and accurate placement of **PortalMark™** labels without contaminating the adhesive.

The 200 Series is designed for use with darker skin surfaces, giving technologists a complete line of options.

PM-100 and 200 - Each sheet includes: 8 field lines, 4 corners, 2 set up points, and 2 isocenters

PM-125 and 225 - Each sheet includes: 8 corners

PM-150 and 250 - Each sheet includes: 18 isocenters, and 6 field lines

All PortalMark™ labels are packaged with 50 sheets per box

Suremark® Relief Tabs™

Mammograms are uncomfortable enough for patients without the painful removal of nipple markers. With this in mind, give your patients some relief with **Suremark®'s Relief Tabs™**. The unique adhesive-free center won't stick to sensitive areas of the skin.

Available in 1.5mm, 2.0mm and 2.5mm ball sizes
Packaged with 110 markers per box

Suremark® Tabs™

This design maintains all of the advantages of our regular Suremark® labels, with the added benefit of a “tabbed” feature. This enables natural and conforming placement on more prominent nipples or where more skin contact is preferred.

Available in 1.5mm, 2.0mm and 2.5mm ball sizes
Packaged with 110 markers per box

Suremark®

The most common style for general use.
Suremark® 1.0mm, 1.2mm, 1.5mm, 1.8mm. 2.0mm and 2.5mm labels are perfect for distinguishing between a nipple shadow and lesion, thereby reducing costly repeat examinations.

Available in 1.0mm, 1.2mm, 1.5mm, 1.8mm, 2.0mm, and 2.5mm ball sizes
Packaged with 110 markers per box

Suremark® Clearmarks™

The **metal-free** semi-lucent markers are made of materials specially designed to clearly mark moles, entry points, and mass locations, yet light enough to enable clear visibility of all underlying details.

Available as SL-MO, SL-MOT, SL-SQ, SL-CR2, SL-T1, and SL-A2
Packaged with 110 markers per box

Suremark® Mole Markers™

These markers are uniquely designed to locate raised moles and other skin nevi without overshadowing micro-calcifications. The radiolucent ring, when placed around a protuberance, prevents flattening due to compression.

Available with 2 ref. points (SL-M2) or 3 ref. points (SL-M3)
Packaged with 50 markers per box
US Patent Number 6,269,148

Suremark® BeautyLine™ Mark

With the same precision design as Clearmarks™, this **metal-free** semi-lucent marker also has beautiful artwork to help relieve the stress of exams.

Packaged with 110 markers per box

CLEARLINE™ *Semi-lucent Scar Markers*

Clearline™ low-density, non-metallic, semi-lucent scar markers provide distinct outlining of scars and other areas of concern.

Patented & LATEX-FREE

DentalMark™ Marking System

Designed specifically for the dental industry. For a variety of uses in facial marking, denture marking, and guided surgery.

SF-10 is ideal for use with Conventional Cephalometrics

VF-10 is ideal for Cone Beam CT

VF-20 is ideal for Denture Cone Beam CT

CF-23 is a larger ball diameter while eliminating artifact in Cone Beam CT Scans

Packaged with 110 markers per box

DM-8

DM-8 DentalMarks improve CBCT flange and denture base scanning. The DM-8 standardized size (2mm) offers real-time precision data for more accurate decision making. The DM-8 is flat, so it can be used on the underside of dentures.

Packaged with 110 markers per box

Suremark® Right™ and Left™

These disposable “right” and “left” markers are useful in a variety of situations where a disposable marker applied to the cassette is preferred, such as portable procedures, and isolation cases. Each label contains a 1/2" (1.2cm) lead letter mounted on a 7/8" (2.23cm) x 1 7/8" (4.76cm) backing, with an easy-peel edge for convenient removal after the label is used.

This cassette marker is not latex-free.

Packaged with 100 markers per box

Price Code: SF

SL-Right

SL-Left

Double Sided Foam Tape

Ideal for fastening film markers to cassettes.

Packaged with 110 strips per box

SL-DT1

Convenient Box Holder

Holds five standard boxes, or two R and L boxes.

Place on a desktop or mount to a wall or imaging machine.
